PROFILE

Self-taught back-end developer who builds products end to end with C#, .NET and ASP.NET Core. Experienced in microservice architectures — API gateways, event-driven messaging, identity and access control, payments and integrations with third-party services — and in running them in production with Docker and Nginx. Also works on the front end with JavaScript and React.

EXPERIENCE

Back-end Developer · Behineh Pardaz Vira

behineh-pardaz.ir

Built services for four production platforms, each designed as ASP.NET Core microservices behind an API gateway.

Medipay24 — medical fintech & BNPL platform · medipay24.com

- Sign-up, authentication and the admin panel, with organisation- and role-based access levels.
- Payments, orders and the support ticket system.
- Integrations with bounced-cheque inquiry and Shahkar (national ID ↔ mobile number verification).
- Event-driven communication between services over a shared event bus.

ViraNex — POS sales, repair & service platform · viranex.ir

- Missions service for field support staff: mission types, priorities and status tracking.
- Discount code service and integrations with payment providers and SMS gateways.

Iriatel — SIM card & mobile services store · iriatel.ir

- Discount code, notification and file upload services.

Viiyan — online flower shop · viiyan.ir

- Products service for the customer and seller apps, plus the notification service.

Founder & Developer · Own products

ChooseBite — find a dish nearby and book a table · choosebite.com

- .NET microservices behind an API gateway (SQL Server, Redis) and one React app for customers, owners and admins.
- Full deployment pipeline: Docker Compose, Nginx, TLS and a CDN.

FitPeak — online workout & nutrition coaching · fitpeak.ir

- Back end, athlete app, coach and admin panels and landing page, on shared SQL Server, Redis and RabbitMQ.

DudRasan — live price board & B2B tobacco marketplace · dudrasan.ir

- CQRS microservices (MediatR) with a YARP gateway, RabbitMQ events and gRPC.
- React buyer app plus seller and admin panels: orders, payments, shipping and price alerts.

SKILLS

Languages

C# JavaScript TypeScript
SQL

Back end

.NET ASP.NET Core
Microservices REST APIs
API Gateway YARP gRPC
CQRS SignalR JWT
.NET Aspire

Data & messaging

SQL Server Redis RabbitMQ
Event bus

Front end

React HTML CSS

DevOps

Docker Docker Compose
Nginx Linux Git CDN & TLS

OPEN SOURCE

AuthAPI

Authentication API with JWT, refresh tokens and role-based authorization, built with ASP.NET Core.
